

FPG-USA.Com announced today that its new book *Winning Against Foreclosure* is being added to its existing online resources empowering millions to Win in their Fight Against Foreclosure.

USA – 01-05-2010 – Forensic Professionals Group USA (FPG-USA) is a valuable online resource for the over 4 million American homeowners in foreclosure and the millions behind in mortgage payments and facing foreclosure. Its much anticipated book *Winning Against Foreclosure* written by FPG-USA's senior qualifying expert, with over 30 years experience, is in publishing and will be available on Amazon.com and other websites in about a week.

Borrowers, attorneys fighting foreclosure, and others that did not do their homework, research, investigation, or hire experts like FPG-USA.com to do this for them are losing the fight against foreclosure. Even in the face of losing, attorneys are saying they "get it", when they simply don't understand. This book lays out the weapons at the borrowers' attorneys' disposal on the FPG-USA website. Winning the fight is all about understanding and implementation:

- How we ended up in this mess
- What we are up against
- How the system works
- What weapons are at our disposal
- How to use these weapons to effect good long term solutions
- How to win

FPG-USA.com can immediately help attorneys and loan modification professionals implement a plan to bring lenders to their knees quickly. In this business, the weapon is proper mortgage analysis. Finding violations in loan documentation and the securitization process of selling loans into investor pools (where lenders earn immediate profits far in excess of the loan amounts themselves) is critical in this process.

- Less than 1% of mortgages are receiving good long term loan modifications.
- The Government admits their programs are failing.
- The only way to deal with these lenders that are foreclosing and not modifying is from a position of strength and it is surprisingly easy and affordable to do.

Richard Kahn, author of *Winning Against Foreclosure* and co-inventor of FPG-USA's patent protected online loan analysis systems, is FPG-USA's qualifying expert witness on all FPG-USA issuances. Mr. Kahn has had a professional career in mortgage analysis, residential and commercial real estate, mortgage backed securities and lender financing that has spanned more than thirty years and billions of dollars in equity and mortgages. He has extensive experience in courts, both State and Federal and has actively held licenses in securities, real estate and lending.
